ASI Home Health Care Customized For You

ASI is a full post-acute care continuum system. Creates improved health care coordination and monitoring of patients outside of the hospital and within the community. It improves patient compliance, therapy management, and fall prevention.

What makes us different?

We treat dual eligible patients. Our services include a transportation system for patients who need a ride to the doctor and home medical equipment. ASI is an all-inclusive agency providing multilingual competent services.

Facilitate Post-Hospital Care

- reduce unnecessary hospital readmissions
- enable the efficient and streamlined monitoring of post-acute care
- collect clinically meaningful data to enhance and adjust care
- support client/patient autonomy through education and communication
- drive value based care by increasing and enhancing ongoing interactions between patients and clinicians
- promotes healing and prevents infections
